

Bruno Wavrzenczak

Statistician and Data Scientist

(41) 98733-6771 | brunowavrzenczak@gmail.com

Portfolio: brunowavrzenczak.github.io/BrunoW/

Professional Summary

Statistician and data scientist with a degree in Statistics and Data Science from UFPR and currently pursuing an M.Sc. in Computer Science at UFPR's Graduate Program in Informatics, with a research focus on Computational Intelligence. Experienced in statistical consulting, predictive modeling, process automation, dashboard development, and AI applications. Works on projects in healthcare and agribusiness, turning data into practical solutions for research and business.

Education

M.Sc. in Computer Science — Graduate Program in Informatics (PPGINF), UFPR 2026 – 2027

Research area: Computational Intelligence.

B.Sc. in Statistics and Data Science — Federal University of Paraná (UFPR) 2022 – 2025

Experience

IoTag — Agricultural Machinery Telemetry 2026 – Present

- Analyze telemetry data from agricultural machinery in agribusiness settings.
- Organize, clean, and structure data to support operational monitoring and actionable insights.

Statistical Consulting — Colorectal Cancer

- Developed machine learning models for cancer classification.
- Conducted comparative analyses of clinical characteristics across patient groups.

Statistical Consulting — Medical Students

- Analyzed student academic performance.
- Assessed curriculum profiles and applied the Kruskal–Wallis test.

Academic Projects and Research

Machine Learning in Healthcare Project — USP 2024 – Present

- Developed machine learning models for schizophrenia diagnosis.
- Processed and analyzed complex data extracted from consultation videos, with an emphasis on unstructured data.
- Applied machine learning algorithms in R.
- Used Python for AI automation and NLP workflows.

PET Statistics Program — UFPR 2022 – 2025

- Active member of Brazil's Tutorial Education Program.
- Organized workshops and short courses on R, data visualization, and related topics for undergraduate students.
- Contributed with both practical and teaching-oriented work in applied statistics.

Technical Skills

Languages:	R and Python
Machine Learning & AI:	Scikit-learn, Keras, TensorFlow, LLMs, NLP, agentic AI
AI Frameworks:	Agno, CrewAI, LangChain
Databases:	SQL
Reporting:	Quarto and R Markdown
Dashboards:	Shiny
Tools:	Git, n8n, API development

Languages

- Portuguese: Native
- English: Fluent

Conferences and Events

- 25th SINAPE (2024) — Fortaleza
- 69th RBras (2025) — Vitória
- 2nd SouthStat Meeting (2025) — Santa Maria
- 3rd Renault Transformation Day (2025) — São José dos Pinhais
